A Free After Effects Template + SFX

Install Fonts

Once your files download as a .zip file, just unzip and look for the Fonts Folder. Install the fonts on your computer by double clicking them and following your computer's prompts.

Getting Started

The projects are optimized for After Effects CC, CS6, & CS5. Open the appropriate project file for your machine. In the project panel, you will see the following menu:

Assets: The Assets Folder is full of the various shape layers and solids that make up the elements, there is no need to mess with that folder.

Generic: The Generic folder has various generic speedometers and meters that can be easily changed to your liking.

Icons: The Icons tab features 5 car indicator icons that can be used in conjunction with the generic meters to create customized meters.

Minimal: The minimal folder has various speedometers and gauges that designed to replicate a futuristic car.

Sports Car: The sports car folder features various muscle car inspired speedometers and gauges.

Using the Elements

Each element can be easily dragged as compositions or exported as individual elements to be used in other projects. You have full access and control to customize them in any way you like. All of the assets are 100% free for you to use in any project. However, RocketStock products may not be sold by themselves, transferred, bartered, traded, shared, leased, or given away to any other party, including other motion design websites.

Additional Help

With highly technical products such as After Effects templates, we receive a large volume of support requests that require detailed responses. This means that unlike our paid products, **we currently do not offer technical support with RocketStock freebies**.
